

Medico-Legal Documentation Services

Comprehensive Medico-
Legal document preparation

Detailed file preparation for consultant review services related to insurance claims, disability determination, and liability cases.

AQuity
Solutions

Secure, detailed and cost-effective document preparation by healthcare documentation experts.

AQuity offers detailed document prep services for independent medical examiners IME and large Medico-Legal firms to support consultant review services for insurance claims, disability determination, and liability cases.

We recognize the importance of complete, accurate and easily manageable Medico-Legal document services for those responsible for claim determinations. AQuity provides 24-hour turnaround times for files up to 2,000 pages, including sorting and indexing. Medical Excerpts, Summaries, Missing Document Registry, and Billing Compilations are optionally available for more complex cases. Files are roadmapped with interactive tables of content to allow smooth document review, enhancing clarity of events, and enabling the doctor or case reviewer to clearly form their own independent opinion.

We recognize many of our clients have limited prep time before needing to make their determinations, so we do everything we can to ensure all information is properly organized, easy to follow, and clearly indexed to the supporting documentation.

AQuity Medico-Legal Documents include:

- Removal of pages not required for review, for example duplicate records
- Sorting into customized pre-defined order, whether by facility, provider, date or to meet specific requirements
- Customer-tailored branding opportunity on table of contents
- Ability to include case specific demographic information for ease of identification

Our records expertise delivers:

- Cost saving for clients billed by file size
- Easy to navigate electronic files, streamlining and saving valuable review time
- Elimination of printing, storage and destruction costs – no more unsecure physical transporting of files
- 24- 72 Hour turnaround times

Medico-Legal Documentation Services Workflow

Solutions for Smarter Healthcare

AQuity delivers measurable healthcare business improvements through virtual scribing, medical transcription, medical coding, interim management, and medico-legal document prep services. Our KLAS and Black Book recognized industry leading offerings support over 3,000 hospitals nationwide for better clinical and financial results.
